SETTINGS TO MAXIMIZE IRIDIUM GO! EXEC® DATA

To maximize available IP data bandwidth for the Iridium GO! exec, make these important setting changes to your smartphone and messaging apps prior to use:

APPLE IOS SETTING CHANGES

- Navigate to "Settings" then "General".
  - *Go to "Software Updates" and turn "Off"*
  - *Go to "Background App Refresh" and turn "Off"*
  - *Go to "iCloud backup" andturn "Off"*
- Navigate to "Settings" then "Privacy & Security"
  - *Go to "Tracking" and then scroll to Iridium GO! exec app and turn "Off"*
- Navigate to "Wi-Fi" and find Iridium GO! exec Wi-Fi connection and click " ⓘ " icon on the right
  - *Go to "Low Data Mode" and turn "On"*
  - *Go to "Private Wi-Fi Address" and turn "Off"*
  - *Go to "Limit IP Address Tracking" and turn "Off"*

ANDROID OS SETTING CHANGES

- Navigate to "Settings" then "General".
  - *Go to "Software Updates" and then "Automatic Updates" and turn "Off"*
- Navigate to "Wi-Fi" settings and find Iridium GO! exec Wi-Fi connection and click " ⚙ " icon on the right
  - *Change setting to "Treat as Metered"*
- If available, enable "Battery Saver" setting to limit background app activity
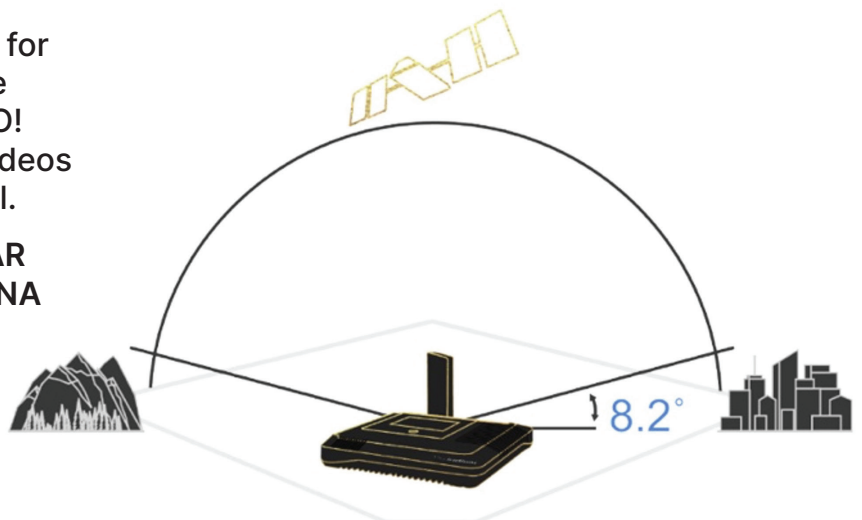

MESSAGING APP SETTING CHANGES (WHATSAPP, SIGNAL, TELEGRAM)

- Turn "Off" the following settings:
  - *Auto download media (photos, videos, audio, and attachments)*
  - *Link previews*
  - *Archiving chats*
  - *Auto backup (videos, media, and everything)*
  - *Any AI assistant functionality*

Note: *These settings can be found within: Data and Storage, Privacy, Chats settings*

After completing the setting changes for your smartphone and apps, follow the instructions included in the Iridium GO! exec Quick Start Guide and tutorial videos on the IridiumComm YouTube channel.

MAKE SURE THAT YOU HAVE A CLEAR VIEW OF THE SKY WITH THE ANTENNA ORIENTED UP DURING USE:
